

FLYRANK AI BACKEND AI ENGINEERING INTERNSHIP

FL-01: AI WORKFLOW AUDIT AND TOOL SETUP

Workflow Audit

This audit reviews recurring internship tasks to determine the most effective way to incorporate AI into each one. The goal is to classify each task by the appropriate level of AI involvement, ranging from independent work to full automation, so that AI tools are used efficiently and responsibly.

Task	Classification	Rationale
Learn AI concepts	Just Me	I need to understand concepts myself before applying them.
Build AI workflows	Collaborate with AI	AI assists with ideas while I design and validate the workflow.
Write Python code	Collaborate with AI	AI helps with debugging and explanations while I verify the implementation.
Prompt Engineering	Delegate to AI with Review	AI generates drafts which I review and improve.
Write LinkedIn posts	Delegate to AI with Review	AI creates drafts while I personalize the final content.
Resume updates	Delegate to AI with Review	AI improves wording while I verify all information.
Research AI tools	Collaborate with AI	AI accelerates research, but I verify important details.
Email drafting	Fully Automate	AI efficiently prepares professional email drafts.
Project documentation	Delegate to AI with Review	AI organizes documentation while I review for accuracy.
Career planning	Just Me	Career decisions require my own judgment and priorities.

Tool Setup

The required tools for this internship have been successfully configured. A ChatGPT account was set up, a Claude account was configured with a dedicated project and custom instructions, and an Anthropic Academy account was created. I enrolled in the AI Fluency: Framework & Foundations course and completed the first learning module.

Three Target Tasks and Success Definitions

The following three tasks were selected as initial targets for AI-assisted work, along with the criteria that define success for each.

Target Task	Success Definition
Prompt Engineering	Produces clear prompts, accurate outputs, and requires minimal revisions.
AI Workflow Development	Executes successfully, produces expected results, and reduces manual effort.
LinkedIn Content Creation	Generates professional content, requires minimal editing, and is ready for publishing.
